¶ Rawe humours is a content of
the vryne whiche thou shalt knowe
thus. If the vryne after his castyng
sette full of grauell mores/ the why
the come of the resydence of the bo-
tom/ or in the mydde regyon/ than
in y vryne be rawe humours. And
yf the rawe humours be aboue on
the water it betokeneth a straye
hede in y brest a short of brothe ond
nyppynge of the splen. And if this
appere i y middi it betokēeth grub-
yng i the body and clen synge in the
guttas and wynde in the stomacke
All this cometh of excelle of meate
and drynke. And if they be i the bo-
tom the payne is in the raynes and
sometyme

somtyme it is in the cobbe. ¶ Fat
heed wout Axcys betokeneth wal-
tynge of grece about the subaument
¶ If it be with an axcis it betokeneth
waltynge of þ body. In the fyrste
spice of the Etyke the fat heed ho-
ueth aboue þ partres as it were of
fat broth. The secōde spyce that bil-
leth all the bryne aboue is lyke the
web be of Erren. The thyrde spyce
the bryne is thycke ouer all fat as
oyle, & if it be cast on a marble stone
it sheweth as oyle and this spyce is
vncurable. ¶ Vermen cōtētes they
be lyke to bryne, somtyme residue as
scales of a fylshe. ¶ If they appere w
in an Axcys they betoken the fyrste
spice of þ Etyke they do apere lyke
vnto bryne that hath lytell of the
flowre with him. In þ thyrde spyce
of the Etyke that do appere conten-
tes lyke these two fyrst but they be
greater and than they be all whyte

 tynge of the body . And yf with
 the Arcis be a flyx and these heres
 appere it betokeneth death.

Spermatyne resoluciōs if they
 B.iiii. appere

appere fletynge about in the bryne
and the bryne rawe in colour it be
tokeneth pyssynge of kynde with-
out lykynge. If the bryne be hye
of colour it betokeneth that it was
made post suppositum. **C**assides
if they appere in the bryne and the

solucyons blacke & blew beynge
in the botom it betokeneth y Eme-
rawd. Also yf the contentes be
blacke oꝝ blew oꝝ Purple with a
lowe colour it be tokeneth stopynge
of the flowe. **T**he laste contents
is called Ipostacis. It standeth in
the botom brode bineth and warpe
vpwarde. If this content be whyte
and brode in the botom and warpe
vpwarde withoute brykynge and
longe lastynge it betokeneth that
the syke is worse than he was. If
it be broken oꝝ haue in the myddes
oꝝ els aboute in the partys it beto-
keneth that the syke man is colde in
the

the lyuer and it may nat desy. And
it be in the myddes/ than it is caled
Reptyles and it betokeneth badde
degestyon and lengthe of syknes.
And it be blacke it betokeneth de-
struccyon of kynde and dethe.

Nowe haue I shewed you þ
substaunce of vrynes the co-
lours the regyons/ and the conten-
tes belögyng to vrynes. And now
wyl I shewe the complexyons. If
the vryne be thicke and red than it
betokeneth blode. And if it be rede
and thynne than it betokeneth co-
lour. And it be thycke and whyte
it betokeneth flume/ & it be whyte
and thin than it betokeneth malan-
coly. And if thou knowe the com-
pleccyons by the coste of the vryne
loke if it be swete thā it betokeneth
blode. If it be sowze it betokeneth
colour. And it be whyte wout sa-
uour as water it betokeneth flume
& it be salt it betokeneth malācoly.

B. v.

Howe

Howe the cōpleccids be gathered

If y wyl knowe where these
compleccions be gēdzed in a
mannes body/ I say that colour is
gendzed in the lyuer and his dwel-
lyng is in y^e co^rer of the gall. Blode
is gendzed in y^e liuer and hys dwel-
lynge is in the vayne. Fleume that
is naturall is engendzed in the ly-
uer/ & it hath no p^{ro}per dwellinge
and therfore he is medled with the
blode to make the blode rennyng.
Malancoly is gendzed in the liuer
and his p^{ro}per dwellinge place is
in the spleene. Malancoly & flume
kepe the botom of the vrynall.

Howe thou shall dyscerne mannes
vryne fro womans vryne/ and bel-
tes vryne fro man and woman.

And thus I wyl that thou vn-
derstāde that if there be any
trubled in mānes vryne it sheweth
in the myddes of the vryne/ and in
the womānes vryne it dothe nat so

And

And there is this the froth after the
castynge of mannes bryne it shall
be longe / & of a womānes after the
castynge it shall be rounde. These
ii. laste tokens Turcena sayeth.

¶ Nowe bestes water fro mannes
water. Beestes water is the sadder
& moze supie of cōpleccid. Also the
bestes water swelleth moze thā the
mannes. Another medle the bryn
of a beste with a mānes bryne / and
they shall parte a sonder. And it be
a Cowe that is w caise / it is good
to knowe fro a womā that is with
chylde / for the Drestes oꝝ the cōten-
tes of the Cowes bryne is muche
greater than the bryne of a womā
in as muche as the woman is lesse &
fayre of cōpleccion than y Cowe is

¶ If thou wyl knowe the fyrst wa-
ter and the seconde / the god heed
sheweth whyther he be in greate
etyng & drynkyng & than the fyrste
water is greater in quātyte oꝝ lesse
drynkyng

rynkyng than the secōde/ & els if
he lyue melurably/ than the fyrste
shalbe moze thycke than the other.
¶ Nowe haue I tolde þ of the sub-
staunce with the colours of the vry-
nes and complectyons/ & to knowe
mannes vryne and womans with
chylde fro the vryne of bestes.

¶ Here foloweth the very knowe-
ledge of all vrynes

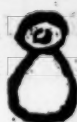

MEn and women fyrst I wyll
begynne at the vryne moſte
